WHAT ARE JAR SPELLS?

Container spells; they are as old as any magical religion known. These versatile spells are for tweaking almost any situation you can think of; from spicing up a relationship to banishing someone away from you forever. The spells being concealed and concentrated in to a jar makes it a much more potent way to do your root-work. Having a spell contained to a jar also gives you a better chance of it working before it has a chance to escape.
You will find that most ingredients in this book are not in exact quantities. This is intentional as it’s not exact on how much you need of each. It’s more to do with how much of something you can acquire or have on hand. It also goes on how much you feel as an individual will be fitting inside your jar. These spells are customizable and not exact. The recipes you find in this book are the ones I have used and had perfected over the years. You may find that you are moved to use something else or add a trinket of some sorts, and that is perfectly ok! It will be more customized to your needs and to you as an individual. So keep the creativity alive!
**Writing a Petition:**

A petition is a piece of paper that you write what your intentions are or the focus of the spell on. Usually just a small scrap of paper not bigger than half a sheet, you will want to write the name or names of people that are the focus of the spell, or write a small description of what the situation you want tweaked. If it is a negative result you want, e.g. a banishing spell, a break up spell, or banishing, you will want to fold the paper up away from your body. If it’s a positive result, e.g. love, luck, or money, you will want to fold it towards your body.

**Storing Your Jar Spell:**

To store a jar spell place in a place that is relevant but is also hidden. For example, a protection spell can be placed underneath the steps or porch in your home. A love jar can be placed in your underwear drawer or buried in the targets yard.

Be creative but secretive!
DISCARDING THE JARS:

After the jar has done its job you will need to properly discard it. You must do this in a respectful manner in order to keep the effects of the jar lasting around you. Either bury the jar under moonlight, or release the contents of the jar in a river. Both ways will be fitting and respectful way to dispose of the jar.
